```c
1  #include <stdio.h> //'stdio.h' contains declaration of 'printf()'
2
3  // Entry-Point Function => main() => Valid Return Type (int) and 2 Parameters (int ⏎
       argc, char *argv[])
4  int main(int argc, char *argv[])
5  {
6      //variable declarations
7      int i;
8
9      //code
10     printf("\n\n");
11     printf("Hello World !!!\n\n"); //Library function
12     printf("Number Of Command Line Arguments = %d\n\n", argc);
13
14     printf("Command Line Arguments Passed To This Program Are : \n\n");
15     for (i = 0; i < argc; i++)
16     {
17         printf("Command Line Argument Number %d = %s\n", (i + 1),argv[i]);
18     }
19     printf("\n\n");
20     return(0);
21 }
22
23
```
